

# VideoChalk™ CK-5

by Boeckeler®

## Classroom Presentation System

**VideoChalk**  
MODEL CK-5

**VideoChalk is the perfect accessory for communicating to your students through video imagery. The economical choice for presentations, sports and classroom programs. Features include marking over live or recorded video, instant switching among two video sources, drawing boards and six built-in background patterns.**

### PERFECT FOR PRESENTATIONS

VideoChalk helps you communicate ideas to students using the technology they relate to the most: video. It works with VCRs, studio and document cameras, DVD players, and more. Whether watching a movie or projecting single images, your markings make it easy for you to direct attention to any area of the display.

### GREAT FOR EVENTS

Use it to annotate sports events, plays, talent shows, and any activities where images are worth a thousand words. Save your breath and use markings for most of the communicating.

*VIDEOCHALK MODELS ARE DESIGNED TO HELP YOU GET THE MOST FROM VIDEO TECHNOLOGY IN YOUR CLASSROOM*

### CHILD'S PLAY

You won't believe how easy it is to hook up and use. All commands are a click away and it draws as easily as pad and paper.

### IT REMEMBERS

While it's on, the CK-5 remembers what you mark over each background mode, so you can mark a video image, switch to the whiteboard and create a diagram, then switch back to the video and your original markings.

VideoChalk templates contain commands in button form for easy access using the digital tablet. The buttons simplify the selection of board and pattern modes, stamps, lines, shapes, and colors. A Clear Markers button makes it easy to start over with a new drawing.

Video Input 1	Video 1	Video 2	Video Input 2
White Board	White Board	Black Board	Black Board
X, Y Axis	X, Y Axis	X, Y, Z Axis	Built-in Patterns
Soccer	Grid	Grid
